Sustainable Group Adds RePlay to the Company's Current Offerings

- A New Version of ReSleeve is Introduced -

SEATTLE, WA – November 8, 2007 - **Sustainable Group** announced today that they have added a new product to their current line of office supplies with a **dual CD case called RePlay**. Made from 100% recycled fibers (56% Post Consumer Recycled fibers and 44% Post Industrial Recycled fibers), each RePlay case comes with two slots for two CD's / DVD's or a single disc and liner notes.

"Plastic jewel cases are just one more thing that gets thrown into the landfill because they are made with PVC and cannot be recycled," said Brad Hole, President of Sustainable Group. "Our new RePlays are not only made with recycled fibers but they are recyclable as well. The RePlay is *the* alternative to plastic jewel cases."

Brown Kraft or 100% PCR white laser labels are available for RePlay customization. Sustainable Group offers free online label templates or customers can design their own cover art and simply run the labels through their own printer.

Additionally, by popular demand, Sustainable Group is offering a new version of their ReSleeve. The "No Holes" product is similar to the original ReSleeve but does not have a window. As with all Sustainable Group's products, the "No Holes" ReSleeve is also made from 100% recycled fibers (56% Post Consumer Recycled fibers and 44% Post Industrial Recycled fibers).

RePlay CD holder's and "No Hole" ReSleeve's are available in cases of 50 and can be ordered online or by calling (800) 488-0966.

Sustainable Group is a Seattle-based manufacturer of unique recycled office supplies and presentation tools. Businesses and individuals have found that using Sustainable Group's line of recycled binders, folders and CD packaging has helped reinforce a message of being socially responsible.
